

PAYMENT / CONTROL / MACHINE FEEDBACK

A happier laundry day.

Connected payment, machine control and real-time cycle feedback for modern laundromats.

**Designed, engineered and built
by Canadians, for Canadians.**

Designed for operator self-installation.

LAUNDROMAT WASHERS - DRYERS - LAUNDRY VENDING

Connected payments. Built for self-installation.

Add connected payment and control to laundromat washers, dryers and laundry-product vending - with a system designed for operators to install.

V-PULSE operates independently as the payment controller. It reads compatible coin-drop pulses, links account-based payment authorization to the machine interface, and can remotely start or stop supported machines. V-SENSE is optional and adds detailed cycle feedback.

Load funds to your account.

Each customer has an individual V-PULSE account. Add funds securely by credit or debit card, then scan the machine QR code or connect by Bluetooth or Wi-Fi to pay from the available balance.

Low fees. Owner-held funds.

One account load can cover multiple cycles, reducing repeated card-processing fees. Loaded funds remain in the laundry owner's designated trust account until used, keeping prepaid balances and the customer relationship under the owner's control.

Your store. Your install.

Four simple stages to get connected.

MATCH + MOUNT

Match the interface. Mount the controller.

CONNECT

Fit machine, coin-drop and optional V-SENSE connections.

SET UP

Set machine numbers, prices and connectivity.

TEST + GO

Run a full test cycle. Repeat across your store.

See the complete wash cycle.

V-SENSE is an optional cycle-feedback add-on that requires V-PULSE. Its external sensors turn machine activity into clear operating status.

HOW V-SENSE CONNECTS

9 SENSOR INPUTS

CAN + POWER

VALVES / x6

EXTERNAL COIL SENSOR

Clip-on sensing at each water-valve coil.

DRUM

FIXED OUTER HOUSING

Reads tumble and extract vibration without touching the rotating basket.

DOOR LOCK

LOCK MECHANISM

Mounted at the actuator to confirm the lock reached its secured position.

DRAIN

COMMERCIAL DRAIN PATH

External sensing on the large molded hose and gravity drain-valve assembly.

REPRESENTATIVE SERVICE-ACCESS INSTALLATIONS

9 INPUTS / KEYED, LABELLED CONNECTIONS

V-SENSE reports the complete washer cycle to V-PULSE.

Your laundry. Connected.

COIN + ACCOUNT

Reads compatible coin-drop pulses alongside account payments.

OWNER-HELD FUNDS

Customer funds remain in the owner's designated account until used.

ONBOARD DISPLAY

Shows controller status and reported errors during setup and operation.

FULL TELEMETRY

Add V-SENSE when full washer-cycle telemetry is desired.

V-PULSE

Operator website

Live machine status

Washer 01	WASH	24:18 REMAINING
Washer 02	RINSE	11:42 REMAINING
Washer 03	AVAILABLE	READY
Washer 04	COMPLETE	UNLOAD

V-PULSE works independently.

Run connected payments, compatible coin-drop reporting, and remote start or stop on supported machines without V-SENSE. Add the sensor system when deeper cycle visibility is wanted.

Try it live. At no cost.

A live remote test machine is available to try.
